There was also attached a small room which could be used for photography; it contained a small transit instrument which I made in the workshop, and a sidereal clock. Except a few photographs of the moon, taken with wet plates, and some experiments on solar radiation with thermo piles, little was done with this instrument. In 1881 I decided to build a new and large observatory, which would be attached to the house. A 24-inch silver-on-glass mirror, of 10 feet 6 inches focus, was ordered from Sir Howard Grubb, and it was erected on the old mounting. This was not found satisfactory, as the mounting was not stiff or heavy enough to carry the extra weight. In 1892 I decided to have the 24-inch mirror remounted by Sir Howard Grubb, and provided with his best form of driving clock...
