Createspace Independent Publishing Platform, United States, 2016. Paperback. Book Condition: New. Illustrated. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.When society measures with the meter of entropy, it measures not its potential in boundless development, but measures instead its perceived smallness. On this path it has become too expensive to live, much less to build the 6000 completely new cities for a million people each that are needed to relocate the nations living outside the tropics, into the tropics, in order that humanity may continue to live when the phase shift to the next Ice Age happens, which will likely occur in the 2050s. The 1933 Glass Steagall law in the USA, was a brave attempt to create an anti-entropic financial system. It had an anti-entropic effect and enabled the USA to develop itself within a couple of decades into the richest nation and the strongest economic force in the world. But this too, needs to be superseded when the building of 6000 new cities and the relocation of much of the worlds agriculture is to be accomplished within the 30 years that we may have still remaining before the phase shift to glaciation climates begins. For this we need an economic system that mirrors the creativity of the universe itself, where every atom is a dynamic construct that is 100,000 larger in size that sum of its parts. Thats the nature of anti-entropic economics. If that is what we aim for, the future existence of humanity is assured. If not, the Ice Age Challenge will not be addressed then, and not be responded to, so that the coming phase shift to glaciation conditions in the 2050s will overwhelm humanity. Very few people will then survive the consequences. Thats why 3 books are...
